

# Advanced Socket Tester

## ST1863A (US plug) / ST1864B (EUplug) /ST1865C (UK plug)

### Features:

- The socket tester is designed to test socket if connects positive and negative pole as required and whether household power protection systems works well or not .
- It can timely remind the user to make adjustment regarding the breakdown and potential safety hazard .
- It tests your protection system to ensure the household electrical safety

### Testing Wiring Statuses :

- >Correct Wiring
- >Open Ground
- >Open Neutral
- >Hot / Neutral Reverse
- >Hot/ Ground Reverse
- >Open Hot
- >Live Neutral Reverse

### Specification :

US regulations

Nominal Voltage  $U_n=90-125V$  (AC)

Tripping Current :  $>5mA$

GFCI Test

European / UK regulations

Nominal Voltage  $U_n=220-250V$  (AC)

Tripping Current :  $>30mA$

RCD Test

Working Temperature :  $-20-60C$

Size: 52(L)x52(W)x63(H)mm

Weight : 50g
