

Electronic Analyze Balance

This series is equipped with standard RS232C data interface which allows direct connection to external equipment such as computer and printer.

This series of electronic balances are widely applied to pharmaceutical research institutes, schools enterprises & public institutions, highway construction organizations and national defence department. It is an ideal instrument for precise measurement.

Feature:

- Humanized design, novel design and five-side full-transparent windshield. A new-generation electromagnetic balance weighting sensor guarantees high precision. Application programs such as automatic fault detection, four-point linear calibration and over-load protection.
- Ultra-large backlight LCD display brings clearer and more comfortable visual sense to operator.

Function:

- Multiple functions guarantee easy and reliable operation, including auto-counting, unit conversion(metric carat, gold ounce, etc.) stability, full-scale faring, zero-memory, etc.
- Built-in RS232C output interface guarantees direct connection to external equipment such as computer and printer.
- Built-in lower weighing hoguarantees convenient use.
