Fruit & Vegetable Juice Clarification

For fruit & vegetable juice filtration, membrane system can effectively remove bacteria, pectin, rough protein; retain nutrient and original flavor at the same time. No additive, no pollution.

Kaimi built more than 200 juice clarification production lines in China, total capacity over 400T/H, occupied 90% Chinese market, exported to Southeast Asia and Europe as well.

· Project Brief

- Project site: Dalian China
- Treatment capacity: 400T/D
- Start at: June of 2010
- Model: KMTC-0412-PU
- Specification: 12.5mmPVDF, F100TM

- Membrane type: Sanitary membrane module
- Designed flux: 80LMH
- Membrane per set: 80 PCS; Series No: 16 PCS
- Component Distribution: 5 x 16/Set
- Treatment per set: 33.3m³/H
· Processible Fruit Juice

- Orange Juice
- Apple Juice
- Cucumber Juice
- Pineapple Juice
- Carrot Juice
- Peach Juice
- Mulberry Juice
- Kiwi fruit Juice
- Blueberry Juice
- Tomato Juice
- Maytree Juice
- Jujube Juice
